DETAILED ACTION

1. Claims 1 and 17 have been amended as requested in the amendment submitted on August 24, 2004. Claims 1, 4-13, 15-18 and 45 are pending in the instant application.
2. Claims 1, 4-13, 15-18 and 45 are allowed. This application is in condition for allowance except for the following formal matters:
3. The instant specification contains recitation of two sequences that are not properly identified by a sequence identifier, see page 6, line 4. These sequences appear to be not new and are identified as SEQ ID NO: 1 and SEQ ID NO: 2, respectively at the bottom of the same page. However, in order to fully comply with the requirements of 37 C.F.R. § 1.821 through 1.825, Applicant is advised to amend the instant specification to insert appropriate sequence identifier after each sequence recited at top of page 6.
4. Figures 2a and 2b of the instant application are not in compliance with 37 C.F.R. § 1.84(u) (1), which states that drawings, which are intended to form one complete view, whether contained on one or several sheets, must be identified by the same number followed by a capital letter, such as, in the instant case, "Figure 2A" and "Figure 2B". Applicant is reminded that once the drawings are changed to meet the separate numbering requirement of 37 C.F.R. § 1.84(u) (1), the specification should be amended to change the Brief Description of the Drawings and the rest of the specification to refer to each Figure accordingly. In order to avoid abandonment of this application, correction to Drawings and the text of the instant specification is required. The correction will not be held in abeyance.

5. The instant disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code, see page 13, line 17. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01.
6. The use of the trademarks has been noted in this application, see page 26, line 9, for example. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

7. Applicant is advised to review the entire text of the instant specification for proper use of sequence identifiers, hyperlinks and trademarks.
8. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
